

Flo-Tite is your One-Stop-Shop for all your Valve and Automation requirements. Flo-Tite's valves are ideal for all your Mining requirements. Flo-Tite's product offering includes SuperAlloy Valves, Ceramic Valves, and PFA Lined Valves for aggressive acids and abrasion, avoiding particulate in your lines.

## HI-TEK SuperAlloys

For extreme corrosion where process media degrades ordinary metals.

Titanium • Nickel Alloys • Chromium  
Zirconium • Copper • Iron SuperAlloys

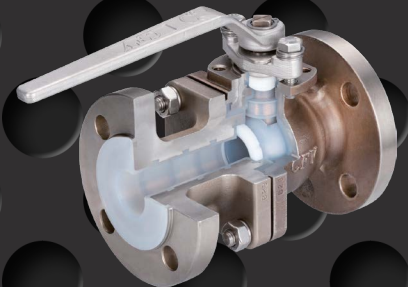

**High Performance Double & Triple Offset Butterfly Valves**  
Performance Series Elastomer Seated  
HP Double/Triple Offset

## Chem-Flo Series

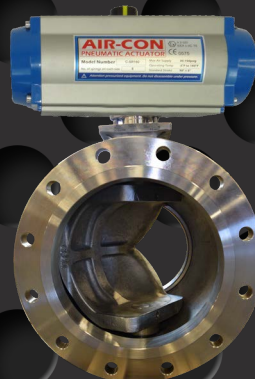

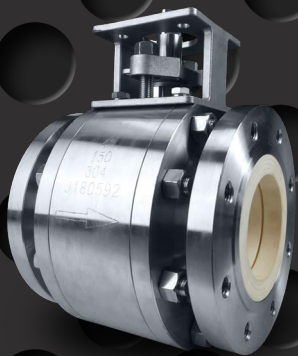

Lined Valves for high corrosion applications

- Lined Ball Valves to 6" in DI and SS bodies
- Ball Check to 4" in DI and SS bodies
- Fully Lined Wafer and Lug Butterflies in DI and SS bodies to 24"

Series

Engineered Ceramics for the Toughest Abrasion and Corrosion Applications

## Sentinel Series

Engineered Valves for Severe Service Applications where Precise Control is Critical.  
Globe to 12"/ANSI 1500  
Cage Guided and Balanced Types  
Noise Control Trims  
Segmented/V-Ball to 24"/ANSI 600
